Dear Admissions Committee,

It is with great enthusiasm that I write to recommend **Harita Joshi** for admission to your program at University of Minnesota. During her internship at Arihant AI, I had the privilege of closely observing Harita's incredible work ethic, her keen analytical skills, and her deep passion for advancing the field of genetics.

At Arihant AI, Harita played a pivotal role in developing and optimizing bioinformatics workflows that directly impacted our precision medicine projects. One of her standout achievements was her work on automating variant classification using machine learning algorithms. This not only enhanced diagnostic accuracy by 25% but also streamlined our processes significantly, helping the team deliver insights more efficiently to clinicians. Harita's ability to bridge technical expertise with real-world clinical applications was extraordinary.

What truly sets Harita apart, however, is her collaborative and innovative spirit. She consistently brought fresh ideas to the table and approached every challenge with determination and a positive attitude. Whether working with her peers or contributing to discussions with senior colleagues, Harita's input was always thoughtful, insightful, and well-grounded. She quickly became a trusted member of the team, and her contributions left a lasting impression on all of us.

Beyond her technical accomplishments, Harita demonstrated a genuine commitment to improving patient outcomes. Her work was always rooted in the larger purpose of empowering healthcare providers to make more informed, personalized treatment

decisions. She approaches her field not just with intellect but also with heart, which I believe will make her an invaluable addition to your program.

Harita's academic foundation, professional experience, and personal drive make her exceptionally well-suited for the challenges and opportunities your program offers. I am confident she will not only excel in her studies but also make meaningful contributions to your academic community.

Please feel free to reach out to me at jay@arihantai.com if you would like to discuss Harita's qualifications further.

Sincerely,

Jay Shah
